Music 147 / In4MatX 190

Overview

Our music website is a platform designed to enhance your listening experience, whether you're working, studying, or simply seeking a moment of relaxation. With a carefully curated selection of music and a user-friendly interface, we aim to provide an enjoyable journey through the realms of sound.

Goals

1. Create a personalized and intuitive platform for music enjoyment
2. Offer a diverse music collection and timer to help keep users motivated and productive.

Interface:

I. Main Interface

The main interface serves as the starting point of our website, providing an aesthetically pleasing and intuitive environment. Here, you can access the instruction of essential features, and start to browse music categories.

II. Splitting interface

Contains a list of music categories, intuitively classified to allow you to easily navigate. You can explore and curate your experience here.

III. Music Interface

Contains different music playlists according to the music category, while having different page backgrounds according to the genre, you can select your favorite and start enjoying it!

Main Functions:

There is a website usage guide that new users can choose to view in the main interface, and it will introduce the functions of different buttons in order as well.

Status setting

Whether you're studying, working or relaxing, you can choose the right state setting for the activity, and receive different reminders and experiences.

Timer

Keep track of your time with our integrated timer function. Monitor your sessions, set reminders, and maintain a healthy balance between work and leisure activities.

Dark/Light Modes

Customize the visual aesthetics of our website and switch between dark and light modes to suit your preferences or ambient lighting conditions.

To-Do List

A convenient feature to keep you organized and focused on your tasks. You can enter up to eight to-do lists to manage your schedule! Your lists are stored locally, so you don't have to worry about losing them, and you can mark them as complete with a click or use "clear" to permanently delete them.

Just note that deletion is irreversible, please proceed with caution!

Notes:

Mobile Compatibility

Please note that the current layout and design of our website are optimized for laptop/computers. While the website is accessible on mobile devices, the user experience may not be fully optimized for smaller screens. For the optimal user experience, it's best to access the website from your computer!

We recognized this limitation, but given the time constraints, we were not able to achieve a design that allows for a user-friendly experience across all devices.
